Rem Siekmann

Candidate, Summit Village Association Board of Directors

Rem Siekmann is seeking election to the Board of Directors of the Summit Village Association (SVA), where he has served as a volunteer since November 2025. He is running to bring careful listening, fiscal responsibility, and a steady, peacemaking approach to the issues facing our community.

OUR COMMUNITY

Rem and his wife, Janet, have lived in the SVA since 2017, when they made their full-time home in The Bluffs to be closer to family. Their roots go back many years to Torch Lake and Burt Lake, and with four children and eleven grandchildren, living Up North is the standard in the Siekmann family.

Because theirs is the only house on their road, Rem knows how important it is to have Board members who will support even a single homeowner's concerns. He believes every SVA resident is equally valued and deserves Board availability, prompt responses, and responsible stewardship of the Association's finances. He plans to take a leading peacemaking role by listening carefully to all sides of our significant issues and working toward the most harmonious resolutions possible.

SERVICE TO THE SVA

Since November 2025, Rem has supported the Roads & Grounds Committee, taking an active role in planning and maintaining the community's roads, safety gates, and streetlights.

PROFESSIONAL BACKGROUND

Rem retired from full-time work in June 2025 after more than 50 years in medical device development, project management, quality systems, and product management. His career includes Baxter, Johnson & Johnson, Mallinckrodt, Hill-Rom, Sunrise Medical, and STERIS.

- **Auditing:** As a Lead Auditor, he performed more than 300 ISO 13485 and ISO 9001 audits. As Technical Manager, he led SAI Global to become one of the first organizations authorized to perform MDSAP audits.
- **Standards and regulatory:** He holds the RAPS Regulatory Affairs Certification (RAC, Devices), served on AAMI ISO-TC210 WG01 for quality management systems, and has been a member of RAPS, AAMI, and ASQ.
